Care for the environment at school

Caring for the environment

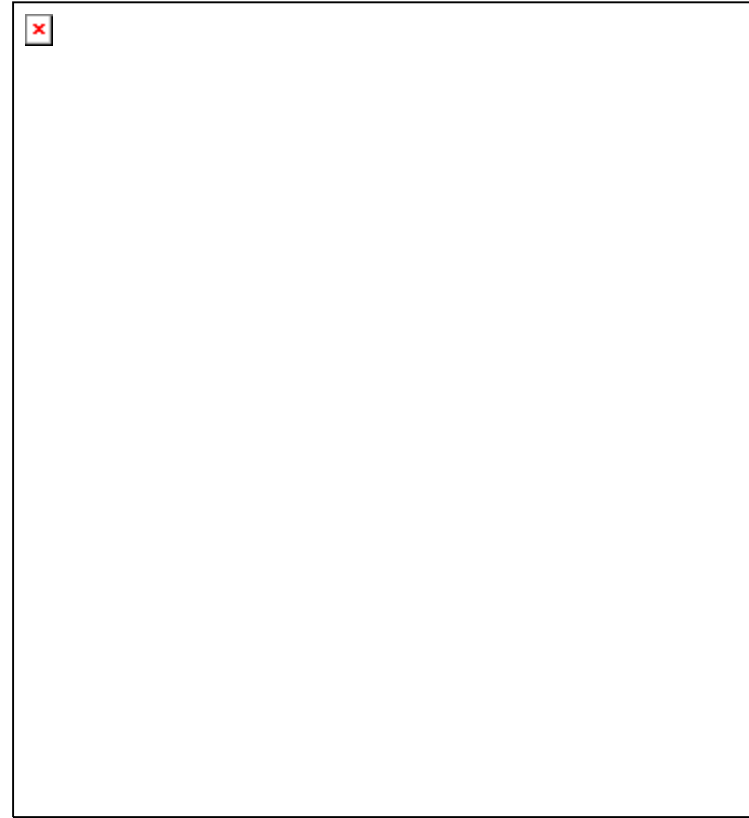

- An attitude
- Exploring
- Doing
- Hearing
-
- A lot of times

MOS: 5 themes

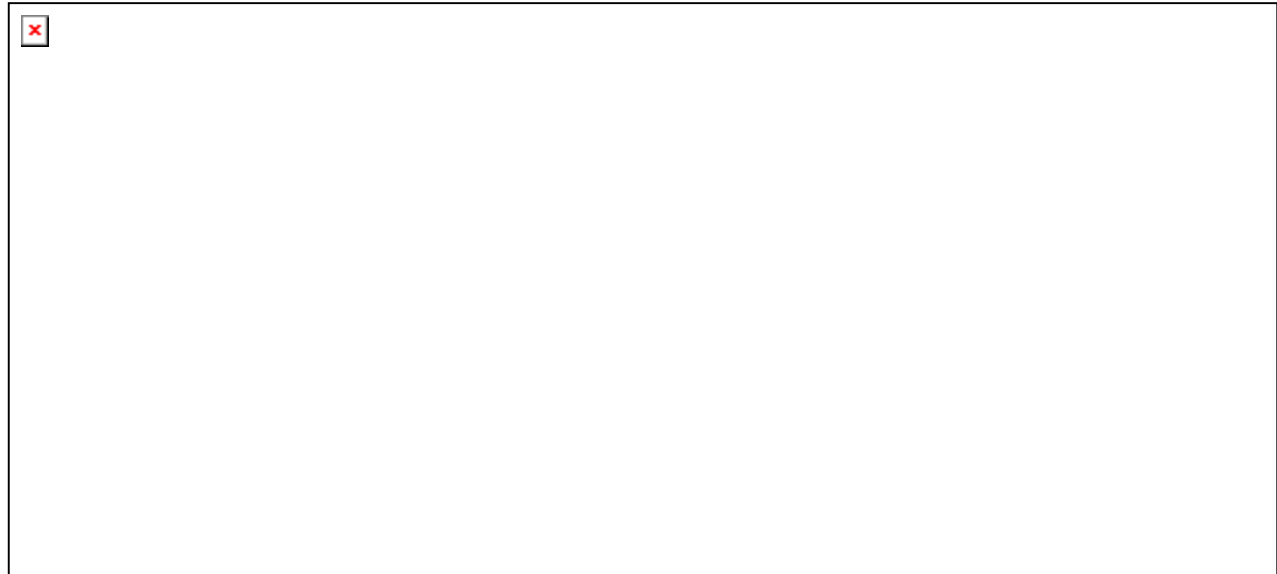

- Water
- Garbage
- Nature
- Traffic
- Energy

→ New project: necessary to save the climate

Working on three levels

- School
- Kindergarten (2,5 till 6)
- Primary (6 till 12)

Garbage

- 4 boxes: fruit, plastic, PMD, rest
- Thursday= health day
- Sort → use again
- Weight of rest → pay → think before buy
→ diagram of the school

Water

- Expensive
- Note the water, electricity and gas use
- Break → drink water
- The proportion salt and fresh water
- The difference Europe ↔ Africa
- Without → no life

Nature

- Open air class
- Work in a nature reserve
- Fruit and vegetables
- Natural balance
- Respect for nature

Traffic

- Friday = bike day
- Week for bikers and pedestrians
- Bike = free
- Car = pollutes

Energy

- Costs a lot
- Sources are ending
- Energy → sun, wind, water, ...
- Production and transport of meat
→ expensive

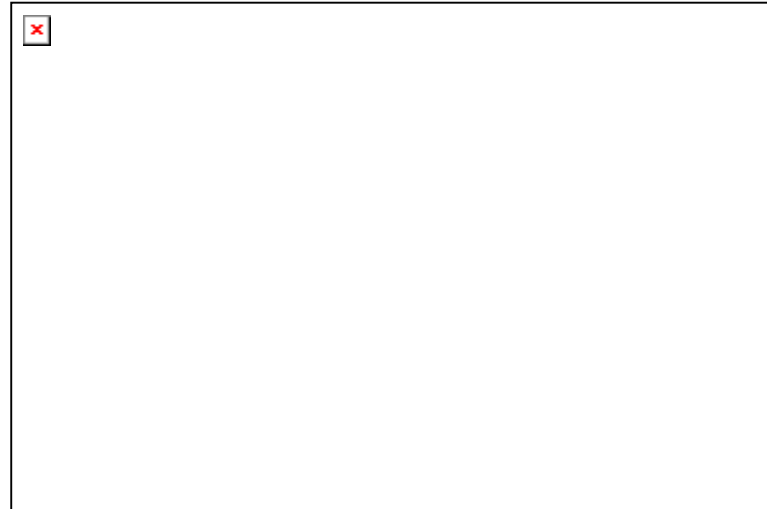

Our target

Less is more!

Our school

- Primary school

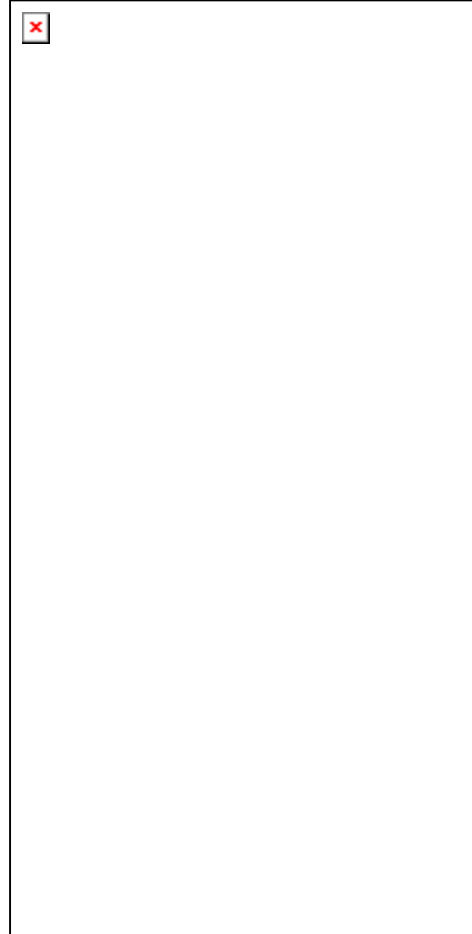

MOS

- Department for environment, nature and education
- Start 2000
- MOS-logo
- Last part 2004

Green flag

- Eco-schools
- International organisation
- 2006 → 2 years
- Today?

Convincing takes time!

- Children and parents
- Colleague's and personnel for cleaning up

The one who holds on, is the one that wins!

We want to win!!!

Thanks for
listening!
